### Overall Results Calculation:

The math is easy. The distance of every course is measured and we calculate average speed based off of each racers finishing time. Then each racers overall series average speed is simply the speed from all the races entered, divided by the number of races entered.

These results show all racers regardless of the number or races entered. However to win overall prizes racers must complete at least four races in the series. If you race more than four, the racer's slowest race will be dropped from the average.

Overall prizes are divided into the following categories:

1. Juniors Men
2. Juniors Women
3. Men under 40
4. Women under 40
5. Men 40-49
6. Women 40-49
7. Men 50+
8. Women 50+

There will only be one overall yellow, green, and red jersey to the overall fastest man and women, and winners of the hill and sprint competition.
